Edidiong Etok

Frontend Developer

etokedidionge@gmail.com | LinkedIn | Website | Github

Creative and experienced frontend developer with 2+ years of experience in building responsive and intuitive user interfaces that enhance user experience. Demonstrated expertise in developing frontend applications using JavaScript, React, Next.js, and Tailwind. I have a proven track record of working with a startup environment alongside a 10-member team, contributing to the creation of software products from inception to deployment.

My expertise extends beyond just coding; I actively contribute to the open-source community, embracing collaboration and continuously learning from peers to enhance my skills. Additionally, my passion for sharing knowledge is evident through my technical articles that offer insights into complex frontend concepts and best practices.

Skills

Technical

- Proficient in HTML, Es6, CSS, Tailwind, ReactJS, JavaScript, TypeScript, and Next.js
- Can use Git, Github, GitLab, Webpack and npm
- Cloud Infrastructure: Netlify, Vercel
- Can interact with Restful and GraphQL APIs
- Animations: Framer motion, Gsap, Locomotive Scroll
- Ability to translate design mockups to CSS

Soft Skills

- Strong problem-solving skills and attention to detail.
- Ability to communicate, and share relevant and valuable information with team members.
- Strong project planning and management skills
- Good documentation skills.
- Ability to work alone and as part of a team.

Productivity Tools and Technologies

Slack, GitHub, Command-Line, Dropbox, Google Calendar and Meet, and Jira

Education

University of Uyo, Uyo, Akwa Ibom State— *Bachelor's Degree in Computer Engineering*
December 2015 - February 2022
I completed my undergraduate studies at the University of Uyo, Uyo with a second-class upper division (2.1).

Professional Experience

[Soft Structures](#) **- Lagos, Nigeria**

Frontend Developer (July 2022 - May 2023)

- Collaborated with a designer on Figma to build professional websites for clients using React, Next.js, Tailwind, and Typescript.
- Implemented UIs for an internal product.
- Bind UIs to Rest APIs provided by a backend developer.
- Collaborated with other front-end developers using GitLab.
- Contributed to the research phase of product development.
- Researched the best approaches to implementing features.

[Codekago Interactive](#) **- Uyo, Nigeria**

Web Developer Intern (September 2020 - July 2021)

- I implemented UI designs using HTML and CSS.
- Collaborated with other front-end developers using Github.
- Contributed to the research phase of product development.

Projects

[NeuRMS](#) - This is a retail management system

- I built the website for this product. The website successfully conveyed basic information, pricing, and an elaborate explanation of its features.
- Translated design mockups to CSS using TailwindCSS
- I contributed to building some features in this product, like tickets/cases for both customers and admin, the Financial-management module, implemented Add, Edit and Delete features for products and customers, etc.

[Scout4Jobs](#) - A job board and recruitment platform

- Implemented UIs with Tailwind
- Bind User Interfaces to Rest APIs
- I build features for both the job seeker and recruiter sides of the application
- Debugged the application

[SoftStructure](#) - *Redesign of SoftStructure company website*

Developed a redesign of the company's website.

[Velsta](#) - *Website for Velsta company*

Developed a website for a virtual assistant company
